

We are pleased to announce the opening of the ParisTech International Admission Program for the academic year 2021-2022.

The program, called the “9+9 program” in China, allows bright undergraduate students in science and engineering to apply to a “Diplôme d’ingénieur” (Master’s degree in Science and Engineering) at the most prestigious French Grandes Ecoles d’ingénieur (engineering graduate schools).

Students can simultaneously apply to 6 of ParisTech schools, for admission into a 2-year education program at master level (“Diplôme d’ingénieur”).

AgroParisTech
Chimie ParisTech
École des Ponts ParisTech
ESPCI Paris
Institut d'Optique Graduate School
MINES ParisTech

Fields of specialization offered at ParisTech schools:

Agricultural engineering - applied mathematics – automatics Bioengineering & biophysics Chemistry - chemical engineering – civil engineering - computational biology - computer science Data science Earth sciences - economics & social sciences - environmental engineering - electrical, electronic & photonic engineering - energy & nuclear engineering - executive engineering Finance – food engineering - forest engineering Industrial & production engineering - information technology & telecommunications Life sciences Management - materials science & engineering - mechanical engineering Neuro-science Optical sciences – offshore engineering Physics Renewable energy - robotics Statistics Transport Urban planning

Main dates of the admission procedure:

June 1, 2020 – Opening of on-line application

September 30, 2020 – Application deadline

October 13, 2020 – On-line written test

End of October 2020 – Interview period

End of October 2020 – Beginning of November 2020: Scientific interview (if requested)

November 20, 2020 – ParisTech Admission Board

November 21, 2020 – Publication of admission results.

We would be very grateful if you could publish this announcement on your website, BBS or WeChat, inform your colleagues and forward this unique opportunity to students you would recommend for this Program.

To find more details about the “9+9” Program and to apply, please click on the following link:
